To whom this may concern,

I am excited to apply to the advertised internship program as I am currently completing my NQF 8 Bachelor of Computing degree at Belgium Campus ITversity, with the internship serving as my final requirement for graduation.

I am eager to contribute my skills in Python and machine learning while gaining hands-on experience in a professional setting. Through my coursework, I have developed a strong foundation in statistical analysis, data visualisation using tools, and programming with languages such as JavaScript and C++. Projects like building predictive models and analysing datasets have honed my problem-solving abilities and attention to detail. I am particularly drawn to the company's innovative approach to leveraging data for sustainable solutions, and I am enthusiastic about the opportunity to support your team with my technical skills and fresh perspective.

I am a quick learner with a passion for exploring new technologies, and I thrive in collaborative environments. I would welcome the chance to bring my analytical mindset and dedication to your organisation, contributing to meaningful projects while further developing my expertise.

Thank you for considering my application. I would be delighted to discuss how my skills and enthusiasm align with your team's needs. I am available for an interview at your convenience and can be reached at: Mosapenya34@gmail.com.

Sincerely,
Ms. MK Penya
